

Environmentally Responsible Project Images

ACADEMY OF SCIENCES, GOLDEN GATE PARK
CHONG PARTNERS WITH
RENZO PIANO BUILDING WORKSHOP

When it opens in 2008, the Academy expects to be the largest public LEED platinum building in the world.

Total green space created including "give-back" to park and living roof: more than 3 acres.
A living roof with 1.7 million plants and 60,000 photo voltaic cells

Baldwin Hills Park, Los Angeles
Mia Lehrer with Walter Hood
Community Conservancy International

The last, large undeveloped open space in urban Los Angeles offers an extraordinary opportunity to create One Big Park, a two square mile urban park, natural and recreation area serving millions of local residents.

Orion Magazine—Paintings commissioned to accompany "A New Spin on Wind"
article written by Josh Weil. November / December 2005 issue

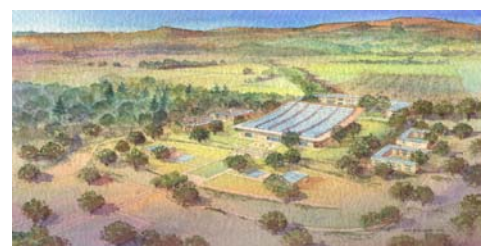

Discovery Science Center, 475kw Solar Cube
Arquitectonica Architects
