

## OREGON HEALTH SCIENCES UNIVERSITY, DESIGN REVIEW IMAGES Perkins & Will Architects, Los Angeles

The story of this project was told using two types of images. Large format detailed paintings for a big picture understanding and sequence sketches to explain the connection and progression of spaces. Working both at the Los Angeles office of Perkins & Will and from my studio, extensive client contact was necessary for these images to be created. The images were effectively used during the successful design review process with the city of Portland.
